**PRELIMINARY COURSE
ASSESSMENT POLICY
& PROCEDURES**

**For 'Learning from Home'
2020**

Learning from Home is a Department of Education term. It refers to periods of time when schools are closed for an extended period of time. Schools continue to provide learning activities for students to complete at home. Stage 6 students are expected to complete assessment tasks, however some tasks have been changed to suit the current learning environment.

What is Assessment?

Assessment is the process of gathering information and making judgements about student achievement. The NSW Higher School Certificate is based on:

- an assessment mark submitted by the school and produced in accordance with the NSW Education Standards Authority (NESA) requirements for the internal assessment program; **and**
- an examination mark derived from the HSC external examinations.

The use of both internal assessment and external examinations of students' achievement allows measures and observations to be made at several points and in different ways throughout the course. The final assessment mark represents a measure of a student's achievement at the end of the course in Year 12. The assessment is based on achievements measured throughout the course and provides an indication of a student's attainment of a wider range of syllabus objectives, than is measured by an examination alone.

The assessment allows due weight to be given during a course to student achievement, which although evident to subject teachers, may not be adequately assessed in a single external examination. Each task assesses the student's actual, not potential performance.

All My Own Work

Students must apply the principles and practices of good scholarship to their HSC studies. As a prerequisite to enrolment in Preliminary HSC courses students were required by the NSW Education Standards Authority (NESA) to complete the HSC: All My Own Work Program. This program is designed to help HSC students follow the principles and practices of good scholarship; to understand and value ethical practices when locating and using information.

The program modules are:

- Scholarship Principles and Practices;
- Acknowledging Sources;
- Plagiarism;
- Copyright; and
- Working with Others.

Students can review the modules anytime at <http://amow.bostes.nsw.edu.au/>

Communication

Students will be given a minimum of 2 weeks' notice when a task is to be used for assessment and they will be given meaningful feedback in a timely manner after the task has been marked. The process of feedback for a particular task will be included in the assessment task notification.

Students are required to sign the assessment register to acknowledge receiving a task; when submitting the assessment task for marking; and again when the assessment task is returned.

During times of 'Learning from Home', students are still expected to acknowledge that they have received an assessment task notification. Rather than signing for the task notification, a student will be asked to acknowledge receipt as per the instructions on the assessment notification. This may be via email, on Google Classroom or by phoning the school if technology is unavailable to you.

Additional tasks or variations to the written program can occur only in consultation with the Deputy Principal. Students will be formally advised of these changes and be required to sign for the new scheduled task.

Submission of Tasks

Tasks must be submitted to the classroom teacher on the due date with an assessment task cover sheet proforma attached. Completing and signing this form is a declaration by the student that the task submitted is their own work and has not been previously submitted in any other course.

~~During times of Learning from Home, students are required to submit assessment tasks as per the instructions on the task notification. Submission of tasks will be in digital form such as email or Google Classroom. If a student is not able to submit a task as instructed, they must notify the teacher via email or by phoning the school before the due date to make other arrangements.~~

~~If the teacher is absent or unavailable, the task must be submitted to the relevant Head Teacher or, in cases where that is not possible, the Deputy Principal. It may also be possible to email the task to the relevant teacher. Students should ensure they sign the assessment task register when handing in a task. The method/s of task submission will be communicated on the assessment task notification.~~

Tasks not submitted by the due date will receive zero marks, however must still be completed. If a student wishes to appeal this, the guidelines set out in the Assessment Policy under the heading of 'Illness-Misadventure Appeal' must be followed.

Tasks submitted late will still be marked and the student will receive feedback from their teacher. Students must make a serious attempt at over 50% of the total course assessment or the Principal will certify that the Preliminary or HSC course has not been studied satisfactorily.

Illness – Misadventure Appeals

Students are expected to make a genuine attempt at all assessment tasks and complete them on time. When this is not possible, the student should contact the teacher and the Head Teacher as a matter of urgency. If an Illness/Misadventure form is to be lodged on a submitted task, it is desirable that it be made prior to the day the task is due with work done up to that point attached.

It is a serious situation if a student is absent on the day of an in-class task or on the day a task is due. An Illness or Misadventure Appeal Form must be completed in this case. It is the student's responsibility to lodge this form within one week with the respective Head Teacher. A Doctor's Certificate (or from another health professional) or a letter from the parent/caregiver is required to explain the absence if the student was sick. In the case of misadventure, written evidence from another person such as a police officer should be provided. This person must not be related to the student. In the case of a death in the family, written notification is required.

Failure to submit an Illness or Misadventure Appeal Form will be interpreted as an admission that the student can offer no valid reason for late assessment, and accordingly a mark of zero will be awarded for the task. ~~Assessment tasks submitted after the due date, without independent evidence of illness or misadventure may be awarded zero marks.~~

~~If a student becomes ill during the sitting of a task, the teacher/supervisor should be informed and an Illness or Misadventure Appeal Form submitted.~~

As much detail as possible should be provided to support the student's case on the Illness or Misadventure Appeal Form. Appeals will be considered as follows:

- In the case of documented medical issues, the Head Teacher will advise the relevant classroom teacher that consideration is to be given.
- In other cases, the respective Head Teacher will organise a panel consisting of the Principal and one or more of the following - Deputy Principal, Year Adviser, AEO and the relevant Head Teacher to consider the application.

Where an acceptable reason is given and supported ~~(e.g. medical certificate)~~, the student may be:

- granted an extension; or
- set a substitute task of similar nature; or
- given an estimate based on other evidence.

If an extension is provided, students must ~~sign for~~ **acknowledge the receipt of the new due date on the Illness & Misadventure Form as instructed by the Class Teacher. This may be via email, on Google Classroom or by phoning the school.** The Class Teacher will provide the student with a copy of this form. Students may lodge an appeal/review of the final decision.

You cannot submit an appeal on the basis of:

- no access to technology (**possible in times of 'Learning from Home'**);
- loss of work due to technology malfunction (**possible in times of 'Learning from Home'**);
- stolen technology (**possible in times of 'Learning from Home'**);
- difficulties in preparation or loss of preparation time - for example, as a result of illness during the course;
- alleged deficiencies in tuition;
- long-term illnesses such as glandular fever - unless you have suffered a 'flare-up' or exacerbation of your symptoms during the assessment period;
- the same grounds for which you received special exam provisions - unless you have experienced additional difficulties during an exam session;
- misreading the exam timetable;
- reading exam instructions incorrectly; or
- attending a school excursion or representing the school.

Illness or Misadventure Appeal Forms are available from each faculty Head Teacher and Deputy Principals. An Illness or Misadventure Appeal Form is included at the end of this booklet.

Submission of 'Draft Work'

Students are permitted to submit 2 drafts of their work prior to the due date for feedback – an initial draft and a final draft. Staff will endeavour to provide feedback within 48 hours of submission. Draft work will be accepted up until 4 school days before the task due date.

N-Determinations

Students may be given an N-Determination for having not:

1. followed the course developed or endorsed by the NSW Education Standards Authority (NESA);
2. applied themselves with diligence and sustained effort to the set tasks and experiences provided in the course by the school; and/or
3. achieved some or all of the course outcomes.

At any point during Stage 6, when a student is not meeting NESAs requirements, the following procedure will be followed:

Step 1: The teacher will interview the student to determine why NESAs requirements are not being met.

Step 2: If the work is not completed within an agreed time, the student will be advised that an 'N Determination Warning' has been made and a written notification will be mailed to the student's home.

Step 3: Steps 1 & 2 are followed with any further unsatisfactory progress/task completion.

If there are 2 'N Determination Warnings' given, a Final N Determination may occur.

This will result in either:

- the student being excluded from that course. This usually means the student will have insufficient units of work for the award of the Preliminary HSC or the HSC; or
- the student may be expelled due to 'unsatisfactory participation in learning by a student of post-compulsory school age'.

If a final N Determination is made, it will be submitted to NESAs. A student has a right to appeal this decision. This must be done by completing and submitting an official NESAs Appeal Form.

Reporting

Students will receive 2 formal reports during the Preliminary Course and 2 during the HSC course. This will be based on achievement of course outcomes. Students will also receive notification of their rank order in each subject, based on their school assessment during and at the conclusion of the course. Final assessment marks are confidential.

Non-Assessment Periods

There will be no assessable tasks scheduled during the week before examinations, nor within the period of the examinations other than the assessable examinations themselves.

Confidentiality

A student's performance in any assessment task or cumulatively in a course is a matter of concern and interest to the subject teacher; the Year Adviser; the relevant Head Teacher; the Deputy Principal; the Principal; the student's parents; and the student. Results relating to one student's performance are not released to other students.

Malpractice

Malpractice represents a significant breach of the ethical requirements of All My Own Work as determined by NESAs. Malpractice is any activity that allows a student to gain an unfair advantage over other students. It includes, but is not limited to:

- copying someone else's work in part or in whole, and presenting it as their own;
- using material directly from books, journals or the internet without reference to the source;
- building on the ideas of another person without reference to the source;
- buying, stealing or borrowing another person's work and presenting it as their own;
- submitting work to which another person such as a parent, coach or subject expert has contributed substantially;
- using words, ideas, designs or the workmanship of others in practical and performance tasks without appropriate acknowledgement;
- paying someone to write or prepare material;

- breaching school examination rules;
- using non-approved aids during an assessment task;
- contriving false explanations to explain work not handed in by the due date; and
- assisting another student to engage in malpractice.

Should malpractice be suspected, students will be required to demonstrate that the work is entirely their own.

Any student participating in malpractice will be awarded zero marks for the task. In addition, all incidents of malpractice are mandatorily notified to NESA.

Additionally, if an assessment task or examination is deemed to be a non-serious attempt, the student will be awarded zero marks.

Offensive / Non Serious Attempts

Non serious attempts will receive a zero mark. Should a student submit an assessment task which is offensive, the matter will be referred to the Principal.

Student Absences

~~Students who have been absent from school should, on every occasion, ask the teacher if assessment information has been given out immediately on return to school. Extension of time will NOT be granted unless there are exceptional circumstances. An Illness or Misadventure Appeal Form would need to be completed in this situation. Students who have prolonged absences need to contact the school as a matter of urgency.~~

~~In extreme cases, such as prolonged absence, the Principal may authorise an 'estimate' rather than a substitute task.~~

~~If a student has prior knowledge that they will be absent when an assessment task takes place, or needs to be submitted, it is the responsibility of the student to arrange a time prior to the date of the task, for submission, or to sit the task. This should be arranged with the individual Class Teacher using an Illness or Misadventure Appeal Form.~~

Excursions / Representing the School

~~If a student is participating in an excursion or representing the school on the day an assessment task is due, then the task should be presented before the planned activity or sent via email to the subject teacher by the due date. In exceptional circumstances, when this is not possible, an Illness or Misadventure Appeal Form needs to be completed for consideration.~~

Special Provisions

It is the responsibility of students with additional needs to remind their teacher of their needs at least one week prior to each scheduled assessment task. This will allow time for the particular provisions to be organised.

Attendance

Where a student's attendance is causing concern, the student may be asked to show evidence to the Head Teacher that they have applied themselves with diligence and sustained effort to the set tasks and experiences provided by the school and that they are not in danger of not completing the course. Any student who attends less than 85% of lessons would be deemed to be causing concern. N-Warning letters stating the work required to be completed will be sent home via mail, email or handed to the student. This work must be completed for the N-Warning to be redeemed.

During times of Learning from Home, attendance will be monitored according to student engagement in the learning activities and tasks set by the class teacher.

Special Notes

NESA has determined policies in relation to students who change schools during the assessment period and those who repeat the HSC. The Deputy Principal should be approached in these circumstances.

The Principal or the Principal's delegate has the right to make rulings in special cases when exceptional circumstances make the procedures of this policy inappropriate.

Student Responsibilities

Students will achieve to the best of their abilities and potential by taking utmost responsibility for the outcome of their education.

Students should:

- be familiar with all assessment requirements and deadlines;
- organise an efficient program of study and work;
- complete and submit all assessable tasks by the due date;
- seek advice and assistance from teachers and discuss difficulties and needs openly; and
- seek clarification from teachers when there is misunderstanding regarding marks allocated for specific tasks (students are encouraged to consult with the Head Teachers and their subject teachers also).

It is emphasised that marks can only be queried at the time the tasks are returned.

Outcomes

Through activities in performance, composition and appreciation, a student:

- P1.1 understands dance as the performance and communication of ideas through movement and in written and oral form
- P1.2 understands the use of dance terminology relevant to the study of dance as an art form
- P1.3 develops the skills of dance through performing, composing and appreciating dance
- P1.4 values the diversity of dance as an art form and its inherent expressive qualities
- P2.1 identifies the physiology of the human body as it is relevant to the dancer
- P2.2 identifies the body's capabilities and limitations
- P2.3 recognises the importance of the application of safe dance practice
- P2.4 demonstrates appropriate skeletal alignment, body-part articulation, strength, flexibility, agility and coordination
- P2.5 performs combinations, phrases and sequences with due consideration of safe dance practices
- P2.6 values self-discipline, commitment and consistency in technical skills and performance
- P3.1 identifies the elements of dance composition
- P3.2 understands the compositional process
- P3.3 understands the function of structure as it relates to dance composition
- P3.4 explores the elements of dance relating to dance composition
- P3.5 devises movement material in a personal style in response to creative problem-solving tasks in dance composition
- P3.6 structures movement devised in response to specific concert/intent
- P3.7 values their own and others' dance activities as worthwhile
- P4.1 understands the socio-historic context in which dance exists
- P4.2 develops knowledge to critically appraise and evaluate dance
- P4.3 demonstrates the skills of gathering, classifying and recording information about dance
- P4.4 develops skills in critical appraisal and evaluation
- P4.5 values the diversity of dance from national and international perspectives

Outcomes

A student:

EE11-1 demonstrates and applies considered understanding of the dynamic relationship between text, purpose, audience and context, across a range of modes, media and technologies

EE11-2 analyses and experiments with language forms, features and structures of complex texts, evaluating their effects on meaning in familiar and new contexts

EE11-3 thinks deeply, broadly and flexibly in imaginative, creative, interpretive and critical ways to respond to, compose and explore the relationships between sophisticated texts

EE11-4 develops skills in research methodology to undertake effective independent investigation

EE11-5 articulates understanding of how and why texts are echoed, appropriated and valued in a range of contexts

EE11-6 reflects on and assesses the development of independent learning gained through the processes of research, writing and creativity

Outcomes

A student:

- P1 differentiates between spatial and ecological dimensions in the study of geography
- P2 describes the interactions between the four components, which define the biophysical environment
- P3 explains how a specific environment functions in terms of biophysical factors
- P4 analyses changing demographic patterns and processes
- P5 examines the geographical nature of global challenges confronting humanity
- P6 identifies the vocational relevance of a geographical perspective
- P7 formulates a plan for active geographical inquiry
- P8 selects, organises and analyses relevant geographical information from a variety of sources
- P9 uses maps, graphs and statistics, photographs and fieldwork to conduct geographical inquiries
- P10 applies mathematical ideas and techniques to analyse geographical data
- P11 applies geographical understanding and methods ethically and effectively to a research project
- P12 communicates geographical information, ideas and issues using appropriate written and/or oral, cartographic and graphic forms

Outcomes

A student:

- 11/12.1 develops and evaluates questions and hypotheses for scientific investigation
- 11/12.2 designs and evaluates investigations in order to obtain primary and secondary data and information
- 11/12.3 conducts investigations to collect valid and reliable primary and secondary data and information
- 11/12.4 selects and processes appropriate qualitative and quantitative data and information using a range of appropriate media
- 11/12.5 analyses and evaluates primary and secondary data and information
- 11/12.6 solves scientific problems using primary and secondary data, critical thinking skills and scientific processes
- 11/12.7 communicates scientific understanding using suitable language and terminology for a specific audience or purpose
- 11.8 identifies that the collection of primary and secondary data initiates scientific investigations
- 11.9 examines the use of inferences and generalisations in scientific investigations
- 11.10 develops, engages with, modelling as an aid in predicting and simplifying scientific objects and processes
- 11.11 describes and assesses how scientific explanations, laws and theories have developed

Outcomes

A student:

- P1 identifies and applies legal concepts and terminology
- P2 describes the key features of Australian and international law
- P3 describes the operation of domestic and international legal systems
- P4 discusses the effectiveness of the legal system in addressing issues
- P5 describes the role of law in encouraging cooperation and resolving conflict, as well as initiating and responding to change
- P6 explains the nature of the interrelationship between the legal system and society
- P7 evaluates the effectiveness of the law in achieving justice
- P8 locates, selects and organises legal information from a variety of sources including legislation, cases, media, international instruments and documents
- P9 communicates legal information using well-structured responses
- P10 accounts for differing perspectives and interpretations of legal information and issues

Outcomes

- 1.1 relates with a respectful and caring attitude to the ocean and its life forms
- 1.2 identifies the roles of individuals or groups involved in maritime activities
- 1.3 recalls aspects of the maritime environment using relevant conventions, terminology and symbols learned throughout the course
- 1.4 recognises Aboriginal and Torres Strait Islander values and attitudes toward the sea
- 1.5 demonstrates an awareness of the value of the ocean as a source of historical information
- 2.1 appreciates the importance of effective management practice
- 2.2 works effectively within a group
- 2.3 communicates information by writing reports, giving short talks and contributing to discussions
- 3.1 evaluates information, situations, equipment manuals and written or manual procedures
- 3.2 collects and organises data by accurately reading instruments, signals and charts; by systematic recording, summarising, tabulating and graphing
- 3.3 generates information from data by calculating, inferring, interpreting and generalising
- 3.4 carries out planned research activities using appropriate measurements, observations, classification and recording skills
- 4.1 identifies marine vocations and a range of leisure pursuits
- 4.2 appreciates marine environments as sources of employment and leisure
- 5.1 values the rules and operating principles of marine equipment and applies them
- 5.2 applies information including weather, regulations, procedures and skills to ensure safe use of marine environment
- 5.3 interprets and follows instructions, with accuracy
- 5.4 selects, organises, assembles, dismantles, cleans, and returns equipment

Outcomes

A student:

- MA11-1 uses algebraic and graphical techniques to solve, and where appropriate, compare alternative solutions
- MA11-2 uses the concepts of functions and relations to model, analyse and solve practical problems
- MA11-3 uses the concepts and techniques of trigonometry in the solution of equations and problems involving geometric shapes
- MA11-4 uses the concepts and techniques of periodic functions in the solutions of trigonometric equations or proof of trigonometric identities
- MA11-5 interprets the meaning of the derivative, determines the derivative of functions and applies these to solve simple practical problems
- MA11-6 manipulates and solves expressions using the logarithmic and index laws, and uses logarithms and exponential functions to solve practical problems
- MA11-7 uses concepts and techniques from probability to present and interpret data and solve problems in a variety of contexts, including the use of probability distributions
- MA11-8 uses appropriate technology to investigate, organise, model and interpret information in a range of contexts
- MA11-9 provides reasoning to support conclusions which are appropriate to the context

Outcomes

Through activities in performance, composition, musicology and aural, a student:

- P1 performs music that is characteristic of the topics studied
- P2 observes, reads, interprets and discusses simple musical scores characteristic of topics studied
- P3 improvises and creates melodies, harmonies and rhythmic accompaniments for familiar sound sources reflecting the culture and historical contexts studied
- P4 recognises and identifies the concepts of music and discusses their use in a variety of musical styles
- P5 comments on and constructively discusses performances and compositions
- P6 observes and discusses concepts of music in works representative of the topics studied
- P7 understands the capabilities of performing media, explores and uses current technologies as appropriate to the topics studied
- P8 identifies, recognises, experiments with and discusses the use of technology in music
- P9 performs as a means of self-expression and communication
- P10 demonstrates a willingness to participate in performance, composition, musicology and aural activities
- P11 demonstrates a willingness to accept and use constructive criticism

Note:

- In addition to the assessment tasks, students must undertake a variety of smaller performance, composition, musicology and aural activities FOR EACH TOPIC in order to satisfy syllabus requirements.
- These additional activities may be class bases and/or individual based.
- The exact nature of these tasks will be more thoroughly outlined closer to the date of submission.

Outcomes

A student:

- P1 identifies and examines why people give different meanings to health
- P2 explains how a range of health behaviours affect an individual's health
- P3 describes how an individual's health is determined by a range of factors
- P4 evaluates aspects of health over which individuals can exert some control
- P5 describes factors that contribute to effective health promotion
- P6 proposes actions that can improve and maintain an individual's health
- P7 explains how body systems influence the way the body moves
- P8 describes the components of physical fitness and explains how they are monitored
- P9 describes biomechanical factors that influence the efficiency of the body in motion
- P10 plans for participation in physical activity to satisfy a range of individual needs
- P11 assesses and monitors physical fitness levels and physical activity patterns
- P12 demonstrates strategies for the assessment, management and prevention of injuries in first aid settings (Option 1)
- P16 uses a range of sources to draw conclusions about health and physical activity concepts
- P17 analyses factors influencing movement and patterns of participation
